

Clark Forklift

Performing globally, there are now 350,000 Clark forklifts and lift vehicles in operation, with in excess of 250,000 of those operating in North America. Clark has five major lines of lift trucks across the globe, making it one of the most expansive organizations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand-driven trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 individual items intended for 20 distinctive brands of lift trucks and automated equipment. Your regional Clark Supplier is your total source for availability of all your components needs offered by Clark Totalift.

Clark features a phenomenal Parts Supply team. The components warehouses are conveniently stationed in Changwon, South Korea and Louisville, Kentucky to ensure exceptional service to both their customers and their dealers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing producers. Motivated to offer the highest level of value and service to our users, Clark remains on the cutting edge when it comes to improving efficiency and benefiting performance.

Internationally, Clark has one of the most impressive dealer support networks. With over 550 locations globally, seller representation in over 80 nations and 230 locations in North America, their high level of dedication to their customers predominates the material handling market.

By pioneering the operator restraint system safety feature, Clark proudly remains a leader of innovation in the industrial equipment and automated forklift industry. This exceptional dedication to safety is now a customary feature on every forklift.

Clark's recurrent mission to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 — Clark, is the first lift truck maker across the world to be certified with the globally accepted quality standard ISO 9001 for each and every one of their production plants. Furthermore, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be ready for any number of environmental limitations, thus placing them in a dominant market position.

Lean Production

Clark has selected the extremely economical and advantageous system of "Lean Manufacturing" for its assembly facilities and use of resources. This system was established to acknowledge the most efficient method of production plant stewardship and ensuring maximum proficiency. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

Engineering

Clark's product engineers and suppliers communicate together to enhance the efficiency and brilliance of their merchandise while minimizing costs. The new value engineering program combines progressive product growth and offers improved consumer support and service within the industry.
